Skills

- React.js | Vue.js | Node.js | Nest.js | MongoDb | PostgreSQL | Hana
- English (Fluent), Portuguese (Native)

Experience

Freelancer   **11/2021– now**

- **Frontend development:** Used React.js to help clients building web applications.
- **Backend development:** Implemented RESTful APIs with Nest and Node, allowing safe and fast data fetching from databases.
- **Code Maintenance:** Refactored legacy code by applying better coding patterns to improve code maintainability and performance.
- **Consulting :** Participated in UI\UX decisions, using my expertise to decide on what technologies to use for development.

Web Developer   **Golive Consultoria**   *Curitiba, PR, Brazil*   **05/2022- 11/2023**

- **Leadership**: Managed company's web sector, working in decision-making, development, deployment and maintenance, being responsible for 4 successfully deployed web applications.
- **Fontend development:** Used React.js, Bootstrap and Tailwind to build responsive, user friendly tools.
- **Backend development:** Implemented APIs with NodeJs and MongoDb and consumed SAP ServiceLayer API to allow SAP table manipulation on the browser.
- **Application deployment:** Used heroku and firebase with a continuous deployment doctrine to publish applications to development and production environments.
- **Improved app performance:** Rewrote several MongoDb aggregations, improving some screen load times up to 200%.
- **Automatization:** Automated several back and frontend routines such as projects interactions, lateness in hours worked register and database cleanups, allowing the managers focus on more important tasks
- **Code and technology improvements:** Brought several new technologies to use on projects, such as NextJS, TanstackQuery, Bun and Tailwind that made web projects noticeably more performative and maintainable.
- **Agile:** Worked with modern methodologies, focusing on CI/CD pipelines.
- **Mentorship:** Shared web development knowledge with several newer employees and interns, aiming to improve the team coding skills.

Intern / Junior Developer   **+a Educação / Imersys**   *Porto Alegre, RS, Brazil*   **05/2020- 04/2022**

- **Fontend development:** Used Vue.js and Vuetify to build educational focusing on online classes creation.
- **Backend development:** Implemented APIs with NodeJs, MongoDb and PostgreSql.
- **Agile:** Worked with agile methodologies with a scrum team.
- **Code Quality:** Implemented Vuex for state management, improving code maintainability and quality.
- **3D rendering:** Implemented Model Viewer for browser 3D object rendering and handling.
- **Code Review:** Conducted code reviews, aiming to improve the team coding skills and knowledge sharing.

Intern   **TCE PR**   *Curitiba, PR, Brazil*   **5/2019- 04/2020**

- **ASP.NET development**: Helped to build audition tools in ASP.NET that helped the community to have better access to government spending information

Education

Bachelor in Computer Science   **Universidade Federal do Paraná**   *Curitiba, PR, Brazil*   **02/2018- 06/2024**

- **Database research:** Currently working on testing different database models performance on relational data.
- **Serious game:** Worked in a serious game Unity project aimed to build a interactive learning game.

Computer Technician   **Instituto Federal do Paraná**   *Curitiba, PR, Brazil*   **02/2013- 12/2016**
